

Mercer County Marina

“Did You Know” Facts:

Lake Mercer was constructed at no cost to taxpayers because the fill was used to construct Interstate 295. In 1975, the 365-acre lake began with the construction of a dam by the U.S. Department of Agriculture Soil Conservation Service (now known as Natural Resources Conservation Service.)

The dam that created the lake was built to control flooding along the Assunpink Creek in the City of Trenton

and neighboring areas. This project turned a former marsh into a lake suitable for boating and fishing, which led to the development of the boathouse and marina.

On the north shore of Lake Mercer, the boathouse of the Finn M. W. Caspersen Rowing Center was privately financed in 2000 by three local private schools for the use by their crew and local teams in order to develop the sport of rowing.

The Finn M.W. Caspersen Rowing Center was designated as an official Olympic training site for the 2004 Summer Games in Athens, Greece, and again for the 2008 Summer Games in Beijing, China. Olympic athletes regularly use Lake Mercer as a training site. The athletes who trained on the Lake won two medals in the 2004 Olympic Games. The US Men’s Eight won the Gold Medal, and the Women’s Eight won the Silver Medal. In the 2008 Games the Women’s Eight won gold, the Women’s Single won silver and Men’s Eight won bronze.

Piscine Pursuits

Lake Mercer is considered one of the best “musky” fisheries in New Jersey, closely followed by the lake’s large-mouth bass population. Lake Mercer truly is a “go-to” place for freshwater fishing.

Lake Mercer also has a thriving population of other species that are accessible by boat and from the shore. Licensed anglers can hope to catch any of the following species: black crappie, sunfish, yellow perch, bluegills, pumpkinseed and American eel to name a few.

The Mercer County Park Commission advocates “Catch & Release” fishing.
